Presentation of BIMDC

BIMDC, established in 2022 by Yassine Yahiaoui, is a design firm that specializes in project management. We provide our partners with digital modeling services, data center design, execution file production, and projects related to renewable energy. Additionally, we serve as ISS coordinators. Our team is dedicated to your projects, offering customized support with a focus on responsiveness, expertise, and resilience.

Since the establishment of BIMDC:

Our facilities

Nevers (58000),
France, Europe

800

Satisfied customers worldwide (France, Middle East, Orient)

90

Projects around the world

10

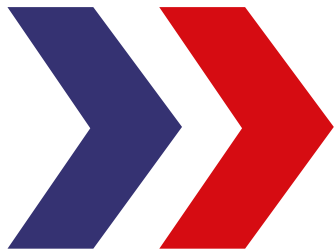

Expert collaborators in their respective fields within the team

15

Average annual turnover change, expressed as a percentage

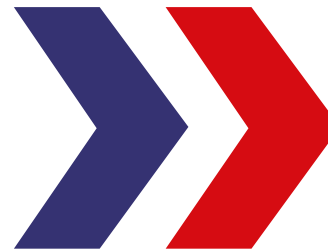

BIMDC Offerings

The partners of the BIMDC consultancy firm leverage its expertise for various project types, including those outlined below:

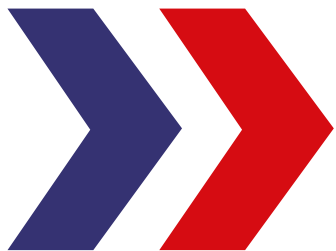

BIM DIGITAL MODEL

Building Information Modeling, technical and experiential projection.

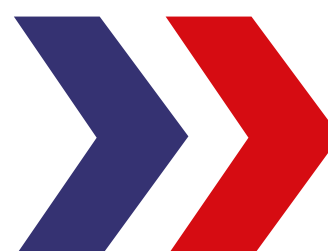

DATA CENTER

Modeling and design of computational resources, architectural configuration, and comprehensive infrastructure.

EXECUTION FILES

Production of execution files: a construction plan developed by the project manager in collaboration with the architect.

RENEWABLE ENERGY

We offer maintenance and reconditioning services to all our customers globally.

DNA of BIMDC

The BIMDC team attentively considers all project requests, providing solutions and customized support, guided by the principles of responsiveness, expertise, and resilience.

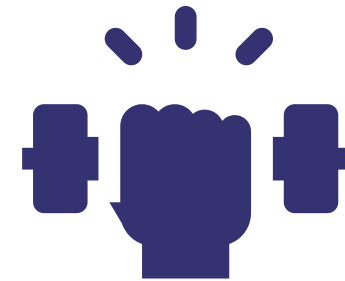

RESPONSIVENESS

Regardless of the project, BIMDC dedicates its efforts to formulating a proposal and executing it promptly. The BIMDC team is available at all times to accommodate the needs of its partners.

EXPERTISE

BIMDC's business experts are dedicated to applying their expertise to guarantee the success of the projects assigned to them, with diligence, professionalism, and utmost confidentiality.

RESILIENC

Accustomed to ^E bespoke solutions and eager to embrace all challenges, BIMDC assists its partners by considering their unique concerns and requirements.
